IDENTIFIERS	*Miami Dade Community College FL

ABSTRACT

A July 1995 report by Florida's Miami-Dade Community College examined reasons for a decline in enrollment among first-time-in-college students, including non-Florida residents, from fall 1990 to fall 1994. This report looks at the change in credits generated by non-Florida residents and foreign students over the same period. Study findings included the following: (1) when comparing the 1990/91 academic year to 1994/95, 55,887 fewer credits were generated overall by non-Florida residents, representing a loss of almost 1,400 full-time equivalent students; (2) over the same period, Florida residents registered an increase of 1,509 credits; (3) with respect to the students' immigration code, Visa students accounted for 11,526 of the total credit loss, while there was a gain of 25,668 credits generated by students with Resident Alien status; (3) with respect to the decline of credits among Visa students, the largest decreases were found for students from Peru at -85, Colombia also at -85, Jamaica at -61, the Bahamas at -56, and Panama at -54; and (4) among Resident Alien students, the largest increases were generated by students from Haiti at 831, Nicaragua at 552, the Dominican Republic at 254, and Peru at 191. Data tables are appended. (TGI)

INSTITUTIONAL RESEARCH

Non-Resident and Foreign Enrollment at
Miami-Dade Community College
1990 Compared to 1994

A recent research report examined the loss of first-time-in-college students since 1990 and suggested three main factors leading to that loss (Brann, R.R. No. 95-07R). Among these was a decline in non-Florida residents which appeared to coincide with the increase in tuition in 1990. The present report looks at the change in credits generated by non-Florida residents since 1990, and further analyzes the change by immigration category. Additionally, data on the country of origin for students in non-U.S. Citizen immigration categories are presented. Results indicate that credits generated by non-Florida residents have decreased by 55,887 when we compare the 1990-91 academic year to 1994-95. This is a loss of almost 1,400 FTE. Analysis of Fall Term data by residency shows that the loss from Fall 1990 to Fall 1994 was slightly more than 22,000 credits. Fully half of this loss, more than 11,000 credits, was from Visa Students. The number of non-U.S. citizens enrolled at Miami-Dade actually increased from Fall 1990 to Fall 1994 (to 21,054 or +8%). The majority of this increase came from Resident Aliens, primarily from Haiti and Nicaragua.

Table 1 shows the credits generated by Florida residents and non-Florida residents during the 1990-91 and 1994-95 academic years. Data are shown by term, and the difference in credits is also shown. These are course campus credits which means that the credits are counted on the campus where the course was offered. Recall that our enrollment peaked in 1991-92 (at 1,277,265 credits) and our current enrollment loss is measured against that marker. When measured against 1990-91, however, credits generated by Florida residents are up by 1,509. Credits generated by non-Florida residents, however, are down by 55,887, for a combined loss of over 54,000 credits. Data by campus show that Kendall and North have had the greatest loss in non-Florida credits (-27,721 and -16,443 respectively). Kendall also shows a loss of almost 30,000 credits from Florida residents.

Table 2 compares Fall Term 1990 with Fall Term 1994. Fall data were used in order to look at Immigration codes. Note that credits in this case are for the home campus which means that all of a student's credits are shown on the campus of record -- no matter where he/she took the courses. Because of this, the campus data will not match the data in Table 1. The Fall to Fall loss in credits for non-Florida residents is 22,180. More than half of this loss occurred at the Kendall Campus (-11,518), with another third occurring at North Campus (-6,705). When we examine the data by immigration code, visa students account for 11,526 of the total loss with 6,631 fewer credits at Kendall and 3,598 fewer credits at North. Note that there is a Fall-to-Fall gain in credits generated by Florida residents (+13,835). This resulted from a large increase in credits from Resident Aliens (+25,668) which offset a decrease in credits from U.S. Citizens (-15,132). This decrease in Florida resident credits from U.S. citizens is substantial at both the Kendall Campus (-17,441) and at the North Campus (-5,606). The increase in Florida credits from Resident Aliens is apparent across campuses, with the largest increase at Wolfson (+8,366).

Tables 3-8 present Fall Term headcounts by immigration status for 1990 and 1994 College-wide and by campus. Countries of origin for the students are displayed if the Fall 1990 college-wide draw from the country was at least 50 students. The bottom of each table shows a subtotal for the countries listed, the remaining countries grouped into the category "other", and a grand total for each immigration code.

Looking first at resident aliens, recall the substantial increase in credits for these students noted in Table 2. Not surprisingly, the Fall 1990 to Fall 1994 college-wide headcount shows an increase of 2,314 students, with the biggest increases in students from Haiti (+831), Nicaragua (+552), the Dominican Republic (+254), and Peru (+191). The increase was spread fairly evenly across three campuses: North (Table 4, +784), Kendall (Table 5, +670), and Wolfson (Table 6, +686). The increase at North was primarily in students from Haiti (+434) and the Dominican Republic (+109), while the increase at Kendall was primarily in students from Nicaragua (+230) and Peru (+114). Wolfson had its increase primarily in students from Haiti (+233) and Nicaragua (+208).

The category with the biggest credit decrease in Table 2 was Visa students (-11,526 credits or -47%). As expected, the college-wide data in Table 3 show 785 fewer visa students from Fall 1990 to Fall 1994 (-41%). The largest decreases were in students from Peru (-85), Colombia (-85), Jamaica (-61), the Bahamas (-56) and Panama (-54). However the decreases from these countries total only 341 students, less than half of the total decrease. An examination of the table shows that there were fewer visa students from almost every country in Fall Term 1994, so that it is difficult to highlight specific countries. Campus data indicate that North and Kendall had the biggest loss of Visa students (-260, and -456 respectively).

One other use of Tables 3-8 is to look at the number of students enrolling from various countries. There are six countries from which we drew more than 1,000 students. Cuba remains the country from which the largest group enrolls (5,256 students), with the majority of them resident aliens. Haitian students are now the second largest group (2,723) with the majority also resident aliens. Nicaraguans (2,671 students) are fairly evenly split between resident aliens and asylee/parolees. Colombian (1,510), Jamaican (1,364), and Peruvian students (1,084) are primarily resident aliens.
